

PRESS RELEASE

**The beautiful shine for glass design**  
**ASLAN presents the photoluminescent glass decoration film**

With its **luminescent film for glass** ASLAN, the innovative manufacturer of self-adhesive films, launches a world novelty **for effective designs on mirrors, windows, glass doors and plexiglass**. By day light it creates glass decorations with etch effect, by night this film turns any glass surface in a shining eye-catcher.

This translucent PVC film has a sandblasted look, which **is luminescent** and rechargeable by daylight, artificial daylight or black light **on both sides**. Its illuminating effect lasts over 12 hours in the dark. ASLAN NL 149 offers a wide variety of creative indoor and outdoor applications such as decorations in children's bedrooms or bathrooms, impressive photo printings, markings and lighting control systems, striking advertising and giveaways, design-style elements in bars and clubs, phosphorescent lamp shades or impressive shop window lighting.

The 350 µm thickly ASLAN NL 149 is digitally printable and suitable for plotter cutting, and guarantees a minimum outdoor durability of 3 years. Free of any phosphor it conforms to international safety requirements (DIN 67510-1). Thanks to its nonpoisonous pigmentation ASLAN NL 149 also is qualified for toys (EN 71-3).

With this exclusive luminescent film ASLAN has widened its glass decoration program and emphasizes its leading position in this sector.

More detailed information concerning these and all other products of the ASLAN range can be requested directly at ASLAN or on the news site under [www.ASLAN-schwarz.com](http://www.ASLAN-schwarz.com)

Ideal for designs using cutting plotter

Print image by day ...by night with light blue colour effect

ASLAN NL 149 charges and lights on both sides
