

## **ASLAN presents new transparent digital printing film with ultra-strong adhesion**

**Overath, 21st March 2018** – ASLAN, German manufacturer of high quality self-adhesive films for special applications, amends the series of digital printing films with ultra-strong adhesion.

### **UltraTack range:**

#### **ASLAN presents DFP 06 - the new transparent self-adhesive film with ultra-tack adhesive**

ASLAN, German manufacturer of self-adhesive films for special applications, provides a new transparent digital printing film with ultra-strong adhesion. The self-adhesive film **UltraTack transparent ASLAN DFP 06**, especially designed for long-term applications, is now available for all applications requiring a transparent film.

Among all the advantages ranks especially the reliable adhesion on difficult surfaces including low-energy materials (i.e. plastic dustbins) but also on rough, uneven or cold surfaces. The digital printing films of the UltraTack range perform even well in application temperatures starting from 5°C (41°F).

The new self-adhesive film UltraTack transparent ASLAN DFP 06 is excellent qualified for applications requiring the substrate's integration in the design. Whether you want to save the motive's release or if the subfont to adhere is part of the motive – there is no limit.

The polymeric plasticised self-adhesive film with a 7-year outdoor durability is equipped with a silicone release liner, double sided PE-coated for optimum moisture and temperature stability guaranteeing an excellent printing result. The digital printing film is perfectly printable with all current solvent, eco-solvent, latex, UV-curing inks as well as screen printing inks.
